A Description of
A New Black Raspberry

Called

Satisfy

Originated by C. R. Bishop, Mitchellville, Iowa

FRUIT—One week earlier than Cumberland. Large shiny black, meaty, fewer seeds and seeds softer, very sweet, very high flavor, dark and rich color when canned.

CANES—A strong grower, canes large, reaching size of 1 inch, needs heavy trimming, rather thorny, and showing very little disease in 6 years of trial. Hardy, throwing out long shoots for the berries to set on, and many berries set on side of new shoots, as many as 28 on a single shoot. This makes them last over a considerable picking period. They load heavy and never turn over sideways as some others do. Are easily picked, but do not shatter off.

They resemble the Gregg somewhat when picked, having considerable bloom on berry and firm enough to be a good shipper. The tip sprouts are red colored when entering ground to set new plants and leaves are red on new plants when they are young.

Order berries and we will ship them 24 full quarts for \$7.00.

FOR THE SPRING OF 1931

we have a limited number for sale at the following prices, express or postage prepaid:

1 year tips, per 100.....	\$10.00
1 year tips, per 50.....	5.50
1 year tips, per 25.....	3.00
One dozen	1.50
2-year-old bearing size, 100.....	25.00
2-year-old bearing size, 50.....	13.00
2-year-old bearing size, 25.....	7.00
One dozen	3.50
